Significant health issues _____

Trip cost- \$120

Please mail check along with form to

Mike Kintgen
885 S. Jersey Street
Denver, CO 80224
720-941-2838
kintgen444@hotmail.com

Trip fee includes Friday night reception/buffet and Sunday dinner and program.
Proposed menu includes lamb, pulled pork, beef and vegetarian. Please indicate
your meal preference _____

Carpooling- Would you consider being a driver and sharing rides if others shared
fuel costs? _____

Some of the routes such as Lookout Mountain and Diamond Peak may require a
high clearance vehicle or 4-wheel drive, especially Diamond Peak

Brown's Park is noted as a location of Fremont Indian rock art. This site is at the southern entrance to Irish Canyon. Developed paths lead you to rock art on both the east and west sides of the road. A parking lot and pit toilets are on the east side of the road.

Dinosaur National Park is just south along US 40, west of Maybell and Craig.

We are considering renting a 10-12 passenger, high clearance van for those who would prefer to ride with someone else. We anticipate the daily cost would be \$25/passenger, rental and fuel inclusive. Would you be interested in this option?

We will post all trip routes, maps and plant lists over the next month. Please indicate if you would prefer a hardcopy to be handed out at the meeting. _____
More trip details will follow on APSDEV.org website and in the January newsletter.

To track regional spring moisture, please go to CoCoRaHS.org and click on Colorado on the national map. The upper left-hand county is Moffat and the moisture station is CO-MF-21 to zoom in on the Craig data. If you have trouble accessing this site, please contact Dwayne Dickerson at 1-800-889-8579 for assistance.
